## **ADDU MEEDHOO COOPORATIVE SOCIETY**

### **Accounting Policies for the year ended 31 December 2019**

#### **1. General information**

Addu Meedhoo Cooperative Society is a co-operative society incorporated in the Republic of Maldives on 29<sup>th</sup> November 2010 bearing registration no. CS-0006/2010. The address of its registered office and principal place of business is Mala, Meedhoo, Addu City, and Republic of Maldives. The main aim of the society is working for the economic and social development and improving the agriculture of the island.

#### **2. Summary of Significant Accounting Policies**

This set of financial statements prepared by Sirius Enterprises Private Limited is in accordance with the 'IFRS for Small and Medium-sized Entities' issued by the International Accounting Standards Board. The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

##### **2.1 Basis of preparation**

These financial statements have been prepared in accordance with the International Financial Reporting Standard for Small and Medium-sized Entities issued by the International Accounting Standards Board. They are presented in the Maldivian Rufiyaa (MVR).

##### **2.2 Revenue recognition**

Revenue from sales of goods is recognized when the goods are delivered and title has passed. Revenue from a contract to provide services is recognized by reference to the stage of completion of the contract. Revenue is measured at the fair value of the consideration received or receivable, net of discounts and sales-related taxes collected on behalf of the government of Maldives.

##### **2.3 Borrowing costs**

All borrowing costs are recognized in profit or loss in the period in which they are incurred.

##### **2.4 Income tax**

Income tax expense represents the sum of the tax currently payable and deferred tax. The tax currently payable is based on taxable profit for the year. Deferred tax is recognized on differences between the carrying amounts of assets and liabilities in the financial statements and their corresponding tax bases (known as temporary differences). Deferred tax liabilities are recognized for all temporary differences that are expected to increase taxable profit in the future. Deferred tax assets are recognized for all temporary differences that are expected to reduce taxable profit in the future, and any unused tax losses or unused tax credits. Deferred tax assets are measured at the highest amount that, on the basis of current or estimated future taxable profit, is more likely than not to be recovered.

The net carrying amount of deferred tax assets is reviewed at each reporting date and is adjusted to reflect the current assessment of future taxable profits. Any adjustments are recognized in profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the taxable profit (tax loss) of the periods in which it expects the deferred tax asset to be realized or the deferred tax liability to be settled, on the basis of tax rates that have been enacted or substantively enacted by the end of the reporting period.

## 2.5 Property, plant and equipment

Items of property, plant and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is charged so as to allocate the cost of assets less their residual values over their estimated useful lives, using the straight-line method. The following annual rates are used for the depreciation of property, plant and equipment:

|                      | Rate              |
|----------------------|-------------------|
| Furniture & Fittings | 10%               |
| Motor Vehicles       | 20%               |
| Speed Boats          | 20%               |
| Plant & Machinery    | 20%               |
| Office Equipment     | 20%               |
| Leasehold Rights     | Over lease period |

If there is an indication that there has been a significant change in depreciation rate, useful life or residual value of an asset, the depreciation of that asset is revised prospectively to reflect the new expectations.

## 2.6 Impairment of assets

At each reporting date, property, plant and equipment, intangible assets, and investments in associates are reviewed to determine whether there is any indication that those assets have suffered an impairment loss. If there is an indication of possible impairment, the recoverable amount of any affected asset (or group of related assets) is estimated and compared with its carrying amount. If estimated recoverable amount is lower, the carrying amount is reduced to its estimated recoverable amount, and an impairment loss is recognized immediately in profit or loss.

Similarly, at each reporting date, inventories are assessed for impairment by comparing the carrying amount of each item of inventory (or group of similar items) with its selling price less costs to complete and sell. If an item of inventory (or group of similar items) is impaired, its carrying amount is reduced to selling price less costs to complete and sell, and an impairment loss is recognized immediately in profit or loss.

If an impairment loss subsequently reverses, the carrying amount of the asset (or group of related assets) is increased to the revised estimate of its recoverable amount (selling price less costs to complete and sell, in the case of inventories),

but not in excess of the amount that would have been determined had no impairment loss been recognized for the asset (group of related assets) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

## **2.7 Leases**

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership of the leased asset to the Company. All other leases are classified as operating leases.

Rights to assets held under finance leases are recognized as assets of the Company at the fair value of the leased property (or, if lower, the present value of minimum lease payments) at the inception of the lease. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are deducted in measuring profit or loss. Assets held under finance leases are included in property, plant and equipment, and depreciated and assessed for impairment losses in the same way as owned assets.

Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease.

## **2.8 Inventories**

Inventories are stated at the lower of cost and selling price less costs to complete and sell. Cost is calculated using the first-in, first-out (FIFO) method.

## **2.9 Trade and other receivables**

Most sales are made on normal short-term credit terms. Trade receivables in respect of such sales are measured at the undiscounted amount of cash expected to be received less any impairment. For sales made on terms that extend beyond normal credit terms, receivables are initially measured at the present value of future receipts discounted at a market rate of interest and are subsequently measured at amortized cost using the effective interest method.

## **2.10 Impairment of financial assets**

At the end of each reporting period, the carrying amounts of financial assets that are not measured at fair value are reviewed to determine whether there is any objective evidence of impairment. If so, an impairment loss is recognized immediately in profit or loss and the carrying amount of trade receivables is reduced accordingly.

## **2.11 Trade payables**

Trade payables are obligations that have arisen by purchasing goods and services under normal short-term credit terms. Trade payables are measured at the undiscounted amount of cash to be paid. The company buys some goods from overseas suppliers. Trade payables denominated in a foreign currency are translated into MVR using the exchange rate at the reporting date. Foreign exchange gains or losses are included in other income or other expenses.

## **2.12 Bank loans and overdrafts**

Loans are measured at amortized cost using the effective interest method. Interest expense is recognized on the basis of the effective interest method and is included in finance costs.

## **3. Information about key sources of estimation uncertainty and judgments**

Estimates and judgments are continually evaluated. They are based on historical experience and other factors, including expectations of future.

### **3.1 Key sources of estimation uncertainty**

The company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

| The breakdown of the revenue is as follows: |                  |                  |
| Trading Income                              |                  |                  |
| Pickup Income                               | 1,997,376        | 2,060,712        |
| Other Income                                | 1,246            | 1,774            |
|                                             | 389,492          | 578,768          |
| <b>Total</b>                                | <b>2,388,114</b> | <b>2,641,255</b> |

The main business of the society is buying agricultural products from farmers at a contracted price and selling the products to hotels and resorts in Addu Atoll. Revenue from sale of goods are recognised when the goods are sold and title has passed. Revenue is measured at the fair value of the consideration received or receivable, net of discounts and sales-related taxes collected on behalf of the government of Maldives.

**Note 12 - Cost of Revenue**

|                    |                  |                  |
|--------------------|------------------|------------------|
| Cost of Goods Sold | 2,134,140        | 2,168,288        |
| Carriage Inward    | 39,560           | 27,050           |
| <b>Total</b>       | <b>2,173,700</b> | <b>2,195,337</b> |

Cost of goods sold includes all the directly attributable costs including purchase costs and other costs incurred to bring the goods to a salable condition.
